CONNECTIONS

Elpress offers a very broad range of products for electrical connections in the form of cable terminals and coupling sleeves in various sizes for various areas of application. Our products, available in sizes from 0.1–1200 mm², are designed and tested to meet current standards such as IEC 61238-1.

SYSTEM
ELPRESS

SIDE

TOOLS

System Elpress consists of connections and tools tested together for optimum fitting. This gives users security and a guarantee of quality.

SYSTEM
ELPRESS

IDE

The outside is the part of System Elpress that you can see. The inside is what you can't see – but what can be perceived in the longer or the shorter term. It's all the work that has to be done before a product is available; all the work to make sure that every single component and link in the system is up to target. The inside is also the support you can get when you need advice or a special solution, or when you're not sure about how to use your product. So the inside is a result of all the precision, competence and industry knowledge that we invest in every product and task.

PRODUCT DEVELOPMENT

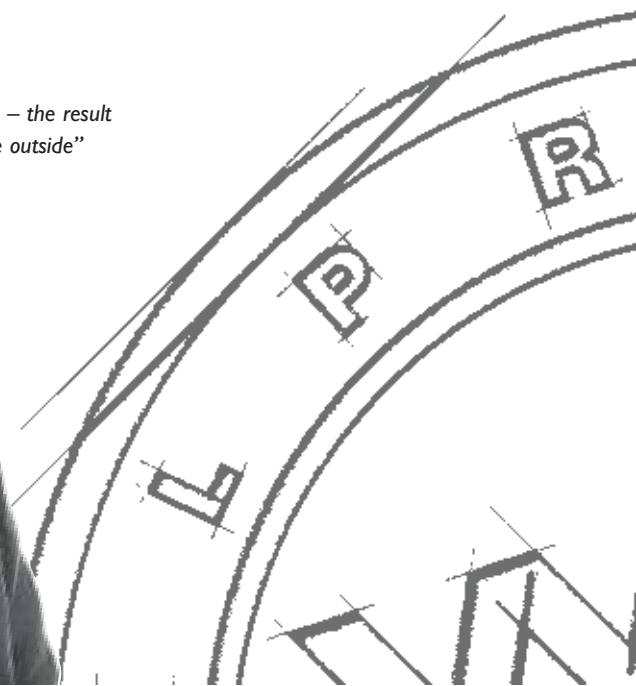

Elpress has its own research and development resources. Our engineers focus on developing new solutions in the field of connections. Tests are carried out at one of the most modern test laboratories in Europe in accordance with international standards, but also with regard to customer-specific requirements.

Almost all the products you buy from Elpress are manufactured at our own plant in Kramfors, Sweden, observing extremely stringent quality control. Our investments in new technology and machinery make us efficient, flexible and fast. This means that we can meet your demands when it comes to supplying standard products, special adaptations and new innovations too. Examples of this are our patented DUAL system, screw connections of our own design and the new PS700 hydraulic tool, which moves forward the boundaries of quality assurance.

R&D

"We use the inside – the result can be seen on the outside"
MD. Hans Haugen

QUALITY AND ENVIRONMENTAL WORK

To us, quality means always striving to be the best in the industry. This is why we're constantly developing our products, our methods and ourselves – because knowledge is perhaps the most important feature that enables to achieve the very best quality. Our quality work has resulted in Elpress gaining accreditation to ISO 9001:2000.

The environment is an important part of quality work, and Elpress holds accreditation to ISO 14001 with regard to this. We're constantly working to safeguard our environment by utilising resources efficiently and thereby reducing the emissions and waste that we generate.

Support

CUSTOMER SERVICE

Many customers need technical, high quality advice. This is why Elpress has set up a support function which includes a hotline for questions on recommended tool solutions, etc. Elpress also has a special team of consultants for more demanding investigations.

Our service department is able to offer you qualified aftermarket support and service relating to our products.

We also offer services such as maintenance, calibration, product hire and training.

If you need assistance or have technical questions – call us at Elpress customer support!
